**Winkonlaser®**

Bringing Beauty and Love by Technology

**RENAFEM+EMS+RF**

Three therapies in a single treatment.

BUILD MUSCLE

SCULPT YOUR BODY

SKIN TIGHTENING

## What is Renasculpt FE60

Renasculpt FE60 builds off the legacy of its predecessor, Emsculpt, by simultaneously emitting both **Radio Frequency** and **High-Intensity Electromagnetic Energies**.

The end result is more fat reduction and muscle growth than any single gold standard procedure, for less time and less money.

## The Renasculpt System Highlights

### Why is FE60 the ONE in body shaping?

FE60 is the specially and only non-invasive body shaping procedure that combines 2 energies for simultaneous fat elimination and muscle building in a 30-minute session.

### What does FE60 therapy feel like?

You can feel intense muscle contractions together with a heating sensation in the treated area which is comparable to hot stone massage.

### What areas can be treated with Renasculpt?

FE60 can be applied over the abdomen, buttocks, thighs, arms & calves.

### How does FE60 compare to liposuction and non-invasive device alternatives?

FE60 does not compare to liposuction. As FE60 is a completely non-invasive treatment. It does not require surgery, needles, anes thes, or any downtime. Organically combines HIFEM and RF to provide three therapeutic effects: muscle building, fat reduction and skin tightening during one treatment.

## High-Intensity Focused Electro-Magnetic Technology

---

It induce short bursts of powerful muscle contractions that lead to increased muscle density, decreased volume, better definition, and improved tone. Also the energy will eliminates the fat cells, so not only for muscle building, but also for fat reduction. Clinical research shows that after a course treatment, it can increase 16% muscle and get 19% fat reduction.

## Electro Muscle Stimulation

---

EMS is a type of electrotherapy stimulates a muscle contraction using electrical impulses, this stimulation creates muscle contractions that can be quick and frequent, fast with long pauses, so get good results on muscle building as well.

**RF+EMS**

**RENAFEM**

## Radio Frequency

---

RF is a nonsurgical method of tightening your skin. The procedure involves using energy waves to heat the deep layer of your skin known as your dermis. This heat stimulates the production of collagen so that get skin firming and tightening results.

# Synergetic Technologies. Superior Results.

+25%  
More Muscles

Renasculpt energy contracts the muscle fibers in the area at intensities that are not achievable during autonomic workout. Extreme stress forces the muscle to adapt, resulting in an increase in the number and growth of muscle fibers and cells. Clinical studies showed on average a 25% muscle volume increase.

-30%  
Less Fat

Due to the radiofrequency heating, the muscle temperature quickly raises by several degrees. This prepares muscles for exposure to stress, similar to what a warm up activity does before any workout. In less than 4 minutes, the temperature in subcutaneous fat reaches levels that cause apoptosis, i.e. fat cells are permanently damaged and slowly removed from the body. Clinical studies showed on average a 30% reduction in subcutaneous fat.

Renasculpt is the most concentrated, the most targeted and the most effective device for body forming on the market. It uses a magnetic field that propagates through clothes and skin inside your body. It works by triggering motor neurons and exciting muscle contractions. It gives you the feeling of a high-intensity workout.

## Workout Smarter Not Harder

Non-essential fat provides greater resistance to athletic motion thereby forcing one to increase the muscle force of contractions per given workout. This takes time, energy and a lot of patience, until one discovers Renasculpt.

---

### **Big Handle × 2**

You begin to feel tangible results right after the treatment. Positive results are usually reported two to four weeks after the last session and continue to improve for several weeks following the treatments.

### **Small Handle × 2**

Renasculpt treatment does not require any pre-treatment preparations. You can follow your regular lifestyle right after the treatment.

### **Pelvic Chair Cushion**

- 1- The active regeneration of collagen in pelvic floor tissues, strengthens pelvic floor muscles, and lifts buttocks
- 2- Improve privacy issues, such as urinary incontinence, penetration, privacy issues
- 3- Achieve vagina tightening.

---

## Platform Benefits

- \* 3 technologies in 1 — HIFEM+EMS+RF.
  - \* Fashion and exquisite appearance designed by famous Chinese designers, the shell materials are made of first-class ABS. The machine only occupies small area and space with compact structure.
  - \* Dual effects — achieving muscle building and fat reducing at the same time.
  - \* 5 handles optional — for independent and synchronized work on different body parts.
  - \* Newly-added cushion — easily reducing fat on buttocks while sitting.
  - \* 10-inch touch screen — simple to use with clear guidance of intellectualized design.
  - \* Time & effort saving — lying / sitting down for 30min = 3000 muscle contractions = 3000 belly rolls / squats.
  - \* Remarkable results — a course of treatment can effectively increase muscle by 25% and reduce fat by 30% at the same time.
  - \* Safe & comfortable — non-invasive treatment with no radiation, pain or side effects.
-
